

Who is TERMOGRAM?

Our company was founded in 1995 and is a leader in Condition Based Monitoring (CBM) in the Central American market

Termogram is organized in three main areas:

- Product Sales: This includes high end and low end equipment
- CBM Engineering Services: This includes IR thermography, Oil Analysis, Vibration Analysis, Electrical Motor Testing (Dynamic and static technologies), Balancing and Laser Alignment.
- Certification Training Courses

All of these in the following divisions:

- Mechanical
- Thermography
- Electrical

TERMOGRAM represents exclusively the best manufacturer firms of CBM equipment and we have highly qualified and trained personnel with International Certifications to warrant an optimal use of our products and services for your benefit.

- We are pioneers implementing CBM programs in Central America based of Vibration Analysis, IR Thermography and Electrical Motor Analysis
- Our implanted programs in customer´s facilities involve advise to purchase diagnostic equipment, commissioning and certification courses so your personnel can evolve from zero to a good start in all the CBM techniques we do
- We are pioneers in **Electrical Motor Analysis being the first company at Latin-American** level having dynamic and static testing equipment to diagnose the health of electrical motors and generators.
- We are pioneers introducing at Central American level **an Expert System to diagnose problem in rotary machinery with Vibration Analysis**
- Our personnel continuously participate in congress and tradeshow such IEEE, UPADI and ISA

Today we have a good customer base such Intel, Kimberly Clark, Hospira, LaGeo, Panama Canal Comission, Instituto Costarricense de Electricidad, CNFL, ESPH, etc which benefit from the use of CBM with our equipment and services.

Our customers also enjoy an additional benefit such our EXTRANET to they can have their Analysis Reports on the Internet, anytime, anywhere.
